

Medium Sized Machinery

for fine lawn areas

For that job that's too small for broadacre equipment and too big for manual pedestrian equipment, Lawn Doctor bring to you their mid range construction, planting and renovation equipment. We have equipment to reduce your labour costs by cutting back on manual handling.

Harley Power Rake

Boxing out, levelling, raking and blending of soils. Also useful for shaping of landscapes and seed bed preparation.

Mounted Level Lawn

Precise final levelling, screeding and seed bed preparation

Disc Planter and Roller

Efficiently discs and rolls stolons into prepared soil and consolidates for excellent strike rates. The speed and accuracy lesson dry out periods of stolons.

Fertiliser Spreader

Save time and money by having a vicon spreader accurately applying expensive products. This machine holds more than a pedestrian hopper, is quicker over the ground and therefore more cost effective.

Verti Mower

Speed and accuracy for renovating passive lawn areas that are too big for pedestrian machines and too small for broadacre. More manoeuvrable for tight areas.
